For the items you checked as 'very experienced' or 'some experience', please provide details below;

My role as a Public Health Nurse in all of the various programs I have worked in has included program planning - assessing needs of the clients/population we serve, setting goals and objectives, planning activities, implementation and measuring outcomes. My current role as a School Health Nurse has provided me with opportunities to implement approved, appropriate population health interventions such as social marketing/social media, community collaboration and mobilization, creating supportive environments, education and skill building, and policy development. I have worked hard to foster, develop and maintain interagency linkages, working relationships and community partnerships, particularly leveraging existing relationships and lines of communication between Algoma Public Health and the relevant school boards.

Being a Public Health Nurse at Algoma Public Health has provided me with numerous opportunities for public speaking: facilitating parenting programs and training programs for staff; providing a variety of presentations over the years to parents/caregivers, educators and students; chairing meetings; presenting at school council meetings, staff meetings.
